SUMMARY

Data Engineer with 2.5 years of experience in enterprise ETL development, cloud data migration, and data governance for banking clients across UAE and KSA. Expert in **Informatica PowerCenter / IICS**, **Oracle PL/SQL**, and **Snowflake**. Skilled in designing mappings, sessions, workflows, and reusable transformations, performance tuning, regulatory compliance, and Agile/Scrum delivery.

EXPERIENCE

C5I

Jul 2024 – Present

Data Engineer

Bengaluru, India

- Designed and delivered 25+ end-to-end ETL pipelines using **Informatica PowerCenter / IICS** and **SSIS** including **reusable transformations, incremental/delta loads**, and **SCD Type 1 & 2** to process 8M+ daily banking transactions across 12+ enterprise source systems with **99.5% data accuracy** and sub-30s SLA.
- Migrated 15 critical pipelines from on-premises **Oracle** to **Snowflake**; reduced query execution time by **65%** through advanced partitioning and materialised views, lowering infrastructure costs.
- Optimised **Oracle PL/SQL** stored procedures via index tuning and execution plan analysis, cutting batch processing time from 2.5 hours to 35 minutes (**77% improvement**).
- Implemented data validation, reconciliation logic, and **reject/error handling** in **SSIS** with automated alerts for 15+ quality thresholds, reducing manual audit effort by **40%** and enforcing financial compliance standards.
- Managed end-to-end Data Retention lifecycle for 180+ assets using **Informatica EDC** and **Informatica AXON**; designed 4-level sensitivity classification framework aligned with PDPL, NDMO, SAMA, and NCA regulations, achieving **100% audit readiness**.
- Built 35+ metadata mappings in **Informatica EDC** establishing complete data lineage from source systems to **Snowflake**, reducing audit preparation time by **35%** and enabling full dependency traceability.
- Developed **Power BI** dashboards monitoring 20+ KPIs across transaction volume, error rates, and SLA metrics for 50+ stakeholders; conducted governance training for 20+ teams, improving data maturity organisation-wide.

upGrad Campus

Jan 2024 – May 2024

Data Science Intern

Remote

- Project: Probabilistic Weather Forecasting with Bayesian Deep Learning and Interactive Visualization**
- Trained and compared three ML models **Decision Tree**, **Gradient Boosting Classifier** (96.93% test accuracy), and **Bayesian Neural Network** on historical weather data using **Python**, **Pandas**, and **NumPy**; applied label encoding, train-test splitting, and EDA via box plots and scatter plots.
- Implemented a **Bayesian Neural Network** to quantify forecast uncertainty probabilistically, enabling risk-aware predictions beyond deterministic baselines; evaluated using confusion matrices and loss-epoch curves.
- Built interactive visualisation dashboards using **Plotly** to display predicted weather patterns and uncertainty levels, improving forecast interpretability for stakeholders in weather-sensitive domains.

SKILLS

ETL & Integration : Informatica PowerCenter, Informatica IICS, SSIS, SQL Server

Data Governance : Informatica EDC, Informatica AXON, Metadata Management, Data Lineage

Databases : Oracle PL/SQL, Snowflake, SQL Server, Teradata

Languages : SQL & T-SQL, Python, Unix/Linux Shell Scripting

Cloud & Analytics: AWS (S3, EC2), Power BI, Plotly, Agile/Scrum

Compliance : PDPL, NDMO, SAMA, NCA Regulatory Frameworks

EDUCATION

Lovely Professional University

2020 – 2024

Bachelor of Technology in Computer Science

Jalandhar, Punjab

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate
